### **CONSTRUCTORS WELCOME APPOINTMENT OF NSW CABINET**

The Australian Constructors Association (ACA) today welcomed the appointment of the Baird Government's new Cabinet.

"The NSW Cabinet contains an excellent mix of experience and skill that should ensure the State is well managed for the long term", said ACA Executive Director Lindsay Le Compte.

"Mike Baird has retained his core group of experienced Ministers while adding new Ministers and Parliamentary Secretaries to ensure that he is able to continuously develop and draw on his leadership team to maintain NSW at the forefront of Australia's social and economic development," he said.

"The program of infrastructure development announced by the Government will ensure that the community and business will be able to move forward with certainty that hospitals, schools, community facilities, public transport and roads will be developed under a coordinated program.

"The Baird Government has planned for the future of the State and its citizens and is delivering on that plan. Importantly, the Government is engaging with business and the general community to ensure that the Government's future planning and funding processes are understood and address identified needs.

"The development of a sustainable pipeline of work will ensure that the construction industry is able to employ and upskill staff to deliver the employment and economic benefits that will flow from the major infrastructure projects on the Government's agenda.

"The ACA looks forward to working with the Baird Government in planning and delivering the State's future infrastructure needs," Mr Le Compte said.
