- 12:10 6D BIM – Driving Carbon Net Zero in Construction
- 12:30 Innovation showcase: ConTech in the spotlight
- 13:20 Lunch and exhibition networking break
- 14:20 Examining how are project requirements are evolving based on innovation, new technologies and client demands for new tech such as Digital Twins?
- 15:00 Why Smart Construction matters in driving efficiency in the race to net zero
- 15:30 Round table discussions
- 15:50 Afternoon coffee, exhibition & networking break
- 16:20 Fireside chat - IoT in Construction
- 16:40 GREEN TECH: Examining how technology is transforming construction innovation and enhancing sustainability across projects
- 17:00 Locknote address: Examining the digital innovation across the design, build and delivery required to build one of the world's largest giga construction projects - Neom
- 17:30 Close of Summit

*"The COVID pandemic has created a once in a lifetime opportunity to reform the construction industry. The opportunity is huge—if we could just halve the gap in productivity growth between the construction industry and other industries over the past 30 years, we could construct an extra \$15 billion of infrastructure every year for the same level of expenditure and employ an extra 15,000 people. I am looking forward to exploring the pathway to a more productive and sustainable construction industry at this year's Future of Construction Summit."*

The Australian Construction Achievement Award (ACAA) is an annual award that recognises innovation and the highest standard of work in the Australian construction and infrastructure industry.

Industry participants and supporters gather each year at a black tie function to celebrate the winner of this iconic award and to recognise their achievements. The event showcases projects selected as finalists and highlights the innovation and project skills of each organisation amongst hundreds of attendees and industry representatives.

The ACAA presentation event is an important event for any professional affiliated with the industry who wishes to network with construction leaders, major clients and industry stakeholders. In 2022, the Award will be presented at a formal dinner function at the Sofitel Wentworth in Sydney.

## THE PRESENTERS OF THE AWARD

The Australian Constructors Association and Engineers Australia are proud to be joint presenters of the ACAA.

The Australian Constructors Association member companies have combined annual revenues in excess of AUD \$100 billion and collectively employ over 200,000 people in their Australian and international operations. In addition to their direct employment activities, ACA member companies utilise the services of many thousands of subcontractors and contract with the many small, medium and large enterprises in the construction supply chain.

With over 100,000 members, Engineers Australia is one of the few engineering bodies in the world able to speak with one voice for the whole engineering workforce. Its breadth of expertise in applied technology enables it to make public comment and give advice to governments in many areas. EA encourages the development of Australia's technological capacity in a way that maximises its contribution to the economic growth of the nation.

- 09:40 **Government & Industry panel discussion: Realising the \$15B productivity opportunity**  
*Productivity growth of the construction industry over the last 30 years trails that of other significant industries by 25%. If we could just halve the gap in productivity, we could be constructing an extra \$15b of infrastructure every year for the same level of expenditure. Government and industry are working together to maximise the value of infrastructure but how does this translate to identifiable actions?*
  - Assessing what is needed to address the productivity shortfall?
  - Procurement reform and value for money

**Panellists include:**

<b>Corey Hannett</b> Director General <b>Major Transport Infrastructure Authority, VIC</b>	<b>Sonya Campbell</b> Executive Director, Head of Infrastructure <b>NSW Treasury</b>

General Counsel  
**Multiplex Constructions**
- 10:20 **Morning coffee, exhibition & networking break**

- 11:00 **Construction leaders panel: New norms, not aspirations — changing the culture of the construction industry**
  - Reviewing the initiatives of the Construction Industry Culture Taskforce and examining what needs to be done to address the less than ideal culture across the Australian construction industry?
  - What is happening abroad and what can Australian constructors learn from their international peers?
  - Looking at diversity and what can the industry do to attract more females and create a more inclusive culture
  - Understanding why changes to culture can increase productivity, improve the work life balance of your workers and how in turn this leads to higher safety standards and other key industry benefits

**12:20 Construction leaders panel: Growing the construction workforce with inbuilt capability**

The construction industry is heavily reliant on the capability, capacity and skills of its workforce to execute the projects it is called upon to deliver. In this session we examine how to improve industry capacity and capability to grow the industry. Important topics include:

- Developing inbuilt capability and the capacity to support the ‘digital by default’ approach outlined by government
- Providing opportunities for stable ongoing employment
- Investing in the career development of workers
- Role of leaders in changing the ‘this is how we’ve always done it’ mentality
